Can we talk? This is becoming something beyond my level... as per Bart's notes below and my conversation with him. First of, they are meeting with the Mayor's Office re: biosolids next week + BOS is getting these emails, and Bart thinks they might ask us to suspend until...

Hey Ty, Natalie, and Idil,

Attached are my suggested changes in track changes.

However, I am concerned that nothing in the response says we heard their concerns and will be considering them. Clearly, this is a strategy decision of what to say, since I know we are considering their concerns. The attached message doesn't acknowledge the seriousness of their charges, that we would reevaluate our process if presented with data, or that we will take any action.

It may be prudent at this time not to say we will reevaluate the program. However, nothing in the response would give them a reason to pause their efforts targeted at the SFPUC, SFE, the Mayor, and the Board.

Bart

Hi Bart, here is the statement for your review.

Tyrone: this includes Natalie's change on the "organic" portion.

We need to send this today.

7/2/2010

Thanks, Idil
