Thiess Indonesia has just signed a new contract worth of US\$51 million with PT Lahai Coal (IndoMet Coal) in Feb 2013, to establish the Haju Mine camp and Infrastructure and to construct the Muara Tuhup Port Facility in Central Kalimantan.

This new contract is the next development of IndoMet Coal project from the previous project that Thiess Indonesia has just completed, Lahai Coal (IndoMet) Construction Project.

Thiess Indonesia will provide client with civil construction services in the form of:

- Supply and installation for Port Material Handling Facility which include Construction of 450m of Coal Outloading Conveyor system Feeder Breaker, Crushers, Outloading Jetty/Wharf and associated facilities e.g. fuel tanks, control room, workshop and weighbridge
- Establishment of the Mining Infrastructure Area including offices, workshop, wash bay for HV and LV, tyre changing bay, LV workshop, warehouse, clinic, emergency vehicles, security house and power, water, sewage, air and fuel reticulation system
- Establishment of Camp area including accommodation, mess halls, kitchens, laundry, recreation buildings, musallah and church
- Establishment of explosive storage area
- Helipad(s)
- Supply and installation of a 12-tonne weighbridge including power supply and civil works
- Construction of hauling road (approx. 1.51 km) and mining road (2.06 km)
- Construction of sediment ponds at camp, Siang Pit and Siang External Dump, mine infrastructure area pad
- Supply and installation communication system backbone to link mine area and the port, including towers and repeater system
- Supply & installation fuel farm to store approx. 1.5 million litre of fuel

This is a 10-month contract, where the kick off project will be in 20 February 2013. The schedule completion of the project is end of January 2014. Thiess Indonesia will appoint in the order of 800 employees for this project.
